Claims 35-49 are canceled.

Claims 23-34 are drawn to non-elected invention.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims lack adequate support in the specification. The terms prodrug and derivative are not defined in the specification so as to ascertain the structures of compounds that are included and/or excluded by the terms. By deleting the terms the rejection would be overcome.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as

the invention. For reasons set forth above under 35 USC 112, first paragraph, the claims are indefinite.

Above compound is proviso out in claim 1. However, such is redundant since the compound is not within the scope of claim 1. Appropriate correction is required.

Claims 11-21 improperly depend from claim 1 and/or 10. The term protective group and the cited groups in 16-17 have no basis in claim 1 or 10, and therefore claims 11-21 are indefinite. The claims must cite only the specific protective groups within the scope of claim 1.

The R-superscripts in the structures of claims 12-20 are not clear, while in claims 19-20, the Rs are not defined. Therefore claims 12-21 are indefinite.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Zheng et al., Chem. Pharm. Bull. (2000), Vol. 48(11), pp. 1761-1765, and Rinehart et al., US 5,514,708, individually.

Zheng et al., disclose compound 4(1) and composition thereof. The structure of the compound is racemate, which under the US patent practice comprises the isomers. The

compound anticipates prodrug and/or derivative of the compounds in claims 1-22. By deleting derivative and prodrug the rejection would be overcome.

Rinehart et al., disclose compounds 1, 3-4, their compositions, isomers and racemates. The compound anticipates prodrug and/or derivative of the compounds in claims 1-22. By deleting derivative and prodrug the rejection would be overcome.
